

Snowmass Snowmaster's Memento (Accoyo)

Vital Statistics

Snowmass Snowmaster's Memento is a well balanced male that we introduced to our breeding program in 2005. His genetics are by Peruvian Snowmaster the Accoyo stud that is now in Australia and his Dam is by PPeruvian Vengador, Accoyo. Both have proven show winning offspring.

Type: Huacaya
Status: Proven
Birthdate: 6/16/2001
Heritage: Full Peruvian
ARI #: 830242
Color: White

Fiber Analysis

He has correct conformation for a breeding male with a good bite and jaw alignment. His fiber exhibits high frequency and high amplitude.

Micron Count:
2002: 20.4/3.2/15.6/0.7
2003: 21.4/4.5/21.2/4.1

Now, in 2006 with Memento's offspring arriving we can actually see what his genetic package added to our females has produced. We aren't disappointed!

Shearing Weight
2005: Shearing length 3"
2006: Shearing weight 4lbs (blanket) Length 3"

Linage Record

Skin and fleece tests conducted by Dr. J.E. Watts in April 2006:
 Snowmass Snowmaster's Memento (age 5)
 Mean fiber diameter 22.4
 Follicle density 44.2
 S/P Ratio 13.3

Dam
MSA Peruvian Sobrina
 White, 800783, Peruvian
 Peruvian Vengador daughter.

Sire
Peruvian Snowmaster
 White, 154963, Peruvian
